### PROFESSIONAL EXPERIENCE

#### Data Entry & Web Development Trainee | 3 Months

##### KOT Enterprises (Software House) — Lahore

- Performed accurate data entry and maintained company records, ensuring information remained organized, consistent, and up to date.
- Entered and managed business information with attention to accuracy, completeness, and timely record updates.
- Worked in a software-house environment and gained practical exposure to structured digital workflows and client-oriented development tasks.

### KEY PROJECTS

#### Online Rental Platform | Web App

Developed a web-based platform concept for listing and renting houses, rooms, and flats. The project focuses on presenting rental properties in an organized manner and providing users with a simple way to explore available accommodation options.

#### Inventory Management System | Software Project

Developed a system concept for managing inventory and stock information. The system is designed to track stock, update inventory levels, maintain organized records, and generate reports, supporting more efficient day-to-day stock management.

#### Learning Management System (LMS) | Web App

Developed a learning-management platform concept for managing courses, students, and academic records. The project focuses on organizing educational information in a centralized digital system and improving access to academic data.

### EDUCATION
